Testosterone cypionate (Depo-Testosterone) is an inexpensive drug used to support normal male development such as muscle growth, facial hair, and deep voice. This drug is more popular than comparable drugs. It is available in generic and brand versions. It is not covered by most Medicare and insurance plans, but manufacturer and pharmacy coupons can help offset the cost. Already feeling more challenged and pushed on this program than I have on anything else. It's totally a mind thing. [1]
