7/4/20 Got paid today, also here's a 315x7 on squat, I'll take it. 2 weeks into bodybuilding and it's a nice change of pace. Trying out some new strategies and if they work I'll implement them for future reference. Currently sitting at 162.4 morning body weight

TURANABOL Chloro-dehydro-methyl-testosterone is a popular anabolic steroid sold under the brand name: Oral Turinabol. This product was recommended for clinical usage in 1965 after great research. Turinabol is a powerful by-product of methandrostenolone which is developed after several modifications. It is responsible to exhibit lower level of androgenic activity.

Turinabol is a popular oral steroid due to its high anabolic properties while being a fairly low androgen. Turinabol is considered to be the main component of the famous East German doping machine, in which thousands of Germany's Olympic athletes were secretly given steroids in hopes of dominating the Olympics.
