For the purpose of performance and physique enhancement, Deca is usually used by beginners in the range of 300 - 500mg per week. Intermediate users normally do not have to venture above the 500mg mark within that beginner range, especially when Deca Durabolin is stacked with other compounds such as Testosterone and/or another oral compound as a kickstarter.

Efficient. The bicep curl is important for those with limited time to train because it is an efficient exercise. That is, the bicep curl not only works your biceps and forearms but also helps train your shoulders and back muscles.
