D-Bal vs Dianabol (dbol): Benefits, Side Effects, Dosage & Results

At its core this is a simple process: increased nitrogen retention results in a higher anabolic state in the body and that means growth of lean muscle. It also means faster fat burning, although Dianabol isn't considered a cutting steroid, it certainly won't hurt those wanting to drop a few pounds of fat.

Dianabol Results: With Before and After Pictures

In general, it is recommended that people take a break from steroids every 4-6 weeks. This allows the body sufficient time to recover while still allowing the individual to make progress towards their goals.
