#1 Thinking of running my first cycle with Tren. Wanting to run a cycle of Test, Tren, Dbol and Proviron. My question is, are Tren and Dbol good compounds to stack? What are the potential negatives of stacking these two? And would Proviron be a good stack to enhance the two as well? joonp Senior Member Jul 7, 2016 #2 Thats ur first cycle?

Cycle: TestE, Dbol & Tren cycle - eroid s

Good info Datdude. I was thinking of starting Tren tgt with Dbol exactly because of what you said. If I end up doing it, I'll pin TestE and Tren at the same time E3D for the first 2-3 weeks for optimal blood levels. This just because the test hasn't had time to compound yet. After that I can switch to TestE 1 x week and Tren E2D. We'll see.

Dbol has a nice synergy with tren, but by the time the Tren E kicks, you'll be done with the Dbol. I hope this helps, and good luck! guitar_jon January 2, 2012, 8:23pm 3

Test E/Tren E/Dbol ad STATS, DESCRIPTION, GOALS EDIT** - Revise my cycle after some well laid out arguments. Now my cycle is an accurate depiction of what I've done thus far. Ignore the test trumping the tren in the beginning. I'm now doing Tren@650 and Test@400. As soon as I run the tren out, I'll up the test again. unless this isn't a good idea.

Dbol vs Test When it comes to the better among Dianabol and Testosterone, the latter wins the contest hands down. This is primarily because Testosterone leads to fewer side effects and offers more value for money. Moreover, Testosterone does not interfere with gastro-intestines. Dianabol, on the other hand, is a potent steroid that is cheaper .

Trenbolone (Tren) is considered to be the most powerful androgenic-anabolic steroid (AAS) available, with an exceptionally high ratio of anabolic to androgenic effects. This means Tren has extremely powerful effects of both the anabolic and androgenic types and is not the best choice for your first steroid cycle. Trenbolone Cycle

Trenbolone Cycle (Tren Cycle Guide) - Steroid Cycles

Tren and dbol are wonderful together. If I were running this cycle, I would run the test alone for the first 2 weeks, then dbol and tren a added in for weeks 3-8. Test only last 4 weeks. Be ready to eat on tren. You may not feel like eating but its crucial for a bulk, which is what I'm guessing you are going for... unreal242785
