That means hazelnuts, walnuts and almonds are tree nuts - but peanuts are not. As "edible seeds from pods you can split in half," peanuts are legumes just like lentils, edamame and garbanzo beans! Anavar dosages are some of the simplest we'll ever plan as there are some solid standards by-which we can go by. When examining many various anabolic androgenic steroids this is not always the case, as total dosing can often vary tremendously depending on the individual goals at hand and even to a large degree
