I consider 50mg's a day of Dbol to be a higher dose for a more experienced user. 30mg's a day of Dbol by itself can be magic if you train and eat correctly. YES.

10 ml vials at 100mg/ml u wanna do 100EOD, so 1 vial = 10 shots. 10 weeks = 70 days/2 (EOD shots) = 35 days => so u need 35 shots. Test Prop 100mg EOD alternating between R/L Glute 23g 1.5" and R/L Quad 25g 1" 10-26-2011, 08:47 PM #17. cb714. Member Join Date Mar 2011 Location world wide [click here to find out more](#)

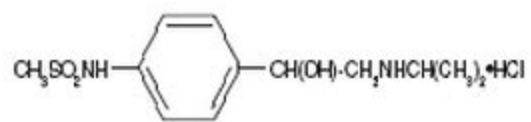

is test prop 300mg/ ml with ethyl oleate doable with out a tone of pain. currently using 100 mg ml with no Bb just ba 8% and shit hurts but usable I'd like a more concentrated version but don't want to feel debilitated

As a pure testosterone, Testosterone Propionate carries an anabolic rating of 100 and an androgenic rating of 100 as well. The testosterone hormone itself represents the basis by which all anabolic and androgenic ratings are measured in all anabolic steroids.
