Others who do not metabolize the cypionate ester consistently might also benefit from including lower dosages of shortened ester for faster onset and peak before leveling out. Again, this is all anecdotal, but it appears that the different effects noticed with a cypionate/propionate blend are experienced with twice per week injections (q3days). Testosterone Cypionate/Propionate Blend (160/40mg/mL), 10mL. SKU. 013. Grapeseed (Empower) or Sesame (APS) Oil. Details . Testosterone is the primary androgen in the body that controls growth, development, and function of male sexual organs and characteristics. This is a controlled medication, commonly prescribed for the treatment of low.

I think cypionate is the slower releasing. Half life. Propionate << enanthate < cypionate. My only comment to the above is that HCG on top of cypionate should do the same thing as propionate on top of cypionate or enanthate. You'd basically get a slow wave I believe with spiked waves superimposed I think.

Sten (testosterone cypionate & propionate + DHEA) Sten yet another blended steroid, similar to Testoviron, but with different dosing and with the addition of DHEA. Specifically, this blend is made up of testosterone propionate and testosterone cypionate, as well as a steroid called dehydroepiandrosterone, or better known as DHEA. [his comment is here](#)

Testosterone Enanthate vs Cypionate vs. Propionate vs. Sustanon. the body. Because the body metabolises free testosterone in a matter of hours, The best way to simulate the bodies' natural testosterone production would be to administer it around the clock in the form of an I.V. drip. Thru my Doctor I have the option of doing a Cypionate /Propionate Blend instead of just Test C. I'm thinking of trying it out. It's a fairly mild dosage of Propionate from what he told me but I didn't get how many cc's. I won't have it available for another 8 weeks but I'm really thinking about it as it would help with leaning out a bit.

Imitating this requires that half the testosterone in a blend be provided by propionate. I was originally drawing esters separately into the same syringe with a resolution of 0.005 mL. This restriction and the ester concentrations explain the quirk of the 4:3 ratio, which computes to a serum variation of +/-23% instead of 25%. For example, propionate injections are finished once every 3 days. Cypionate injections are needed only on a weekly basis. Chemical formula. The ester contributed to the testosterone particle to make it more soluble in oil is various for cypionate and propionate. Cypionate ester is $C_{27}H_{40}O_3$, which makes it the longest ester chain available.

Specifically formulated for men, our Elite Hormone Blend is a special blend created for Elite Wellness and Anti-Aging patients. This special blend of Propionate/Cypionate provides the benefit of short and long-acting Testosterone esters to prevent serum/plasma level fluctuations. [try these out](#)
