GP Tren Enanth is an injectable steroid containing 200 mg per ML of the hormone Trenbolone Enanthate. The Enanthate ester attached to this steroid makes it possible to keep blood levels steady with less frequent injections than if the bodybuilder was using the acetate ester of the drug.

This is my first time making it so like most first times I tend to stick to the instructions and don't add/change much as I want to try it all natural. With that being said I can already tell that next time I will probably use my egg beater substitute, add a little extra liquid like some 2% milk or casein protein shake, nuts of some kind, and let the batter sit in the pan on the counter for about 10/20 minutes prior to baking. I did however use my goto keto baking trick and covered it, cooked for 20 minutes, uncovered, cook for 5, rotate, cook for 5. Order injectable anabolic steroid GP Tren Enanth 200 online.
