ANAPOLON 50mg - ABDI IBRAHIM Anapolon (also known as Oxymetholone and Anadrol) is a synthetic anabolic steroid developed in 1960 by Syntex Pharmaceuticals. Initially, Anapolon was developed as a drug for osteoporosis and anemia treatment, as well as to stimulate muscle growth in malnourished and debilitated patients. Anapolon (manufactured by Abdi Ibrahim) is available in tablets of 50 mg and it is one of the most powerful androgenic steroids. Something that most people take for granted. Something I'm just learning now what actually is supposed to feel like - being at ease, going for a walk or looking at a reflection.

A gentle reminder than I am human and it's ok to feel low but to carry on and do my workout regardless because even though today was tough it will be worth it [review](#)

Pharmaceutical grade Adrol can run for around \$1.30 - \$2.50 per 50mg tablet. Underground quality Anadrol can often be found and bought for \$0.75 - \$2.30 per tablet. Of course, this is a very large range and is very dependent on not just the grade of product (pharma vs. UGL), but also on the actual type of source utilized, with the two major ...
