What is Deca Durabolin. Deca Durabolin is a form of synthetic testosterone. It has the exact same effects that testosterone has on the body; this includes increased hair growth, red blood cell count and increased muscle formation. Athletes, in particular, use the steroid to help improve their recovery from injuries, manage their joint pain and increase the intensity of their workouts. Deca is known to have hormone regulation properties. It helps to free up some of the testosterone that is tied up and unusable inside our bodies and can increase free testosterone by up to 30%.
