Fiction: 2-300 mg/week of Deca is a small dosage. Fact: 300 mg - 400 mg/week of Deca is the most anyone should ever need and going beyond that is a system of diminishing returns. Great gains can be made on 200-300 mg/week! Fiction: Deca will make you retain a ton of water. Recently after regaining health care and having a miscarriage due to these health issues, doctors began to believe me and I began to AGGRESSIVELY advocate for my health,... and here is what we found. 1 x Deca 300mg Vial. 10ml per bottle. Expiry date: 2026 All oils have 2% Benzyl Alcohol & 20% Benzyl Benzoate for low PIP and 5 year expiry dates and suspended in grapeseed carrier oil.

Due to the steroid's long half-life one injection per week could get the job done. However, most will find two small equal size injections per week that total the desired weekly dose to be most efficient. This will cut down the total injection volume. Be realistic: you wont know much on day 1 , you ll have multiple questions will need help with basic stuff. Don't shy away from asking questions or asking for help. This is the only time you ll learn [this guy](#)
