I'm here today to see a friend of mine compete, he's been lifting for nearly 20 years, he's only started
taking steroids the last 3 years, he's competed multiple times and he's progressed each time, he's
seriously committed to the sport of Bodybuilding, now he's the complete opposite to the people that
jump on steroids on year one, now if you're thinking about doing steroids to compete just that one time
to say that you did it, or you're going to be doing it for your summer holiday's, please seek professional
advice from someone that's responsible, ideally not the person selling you the steroids, ye, that's all I've
got to say.

your endocrine system and adrenal response. * MK-677 is also likely to increase cortisol, ACTH
(adrenocorticotrophic) and prolactin levels receptor agonist) but lacks oestrogen activity. Vegetarians
