Inevitably 1 out of a million must have superior genetics and these are the athletes we become obsessed with and then assume it must be the superior environment and higher quality of life that create these beasts .

Norditropin® SimpleXx® is available in three strengths: 5 mg/1.5 ml, 10 mg/1.5 ml and 15 mg/1.5 ml (equivalent to 3.3 mg/ml, 6.7 mg/ml and 10 mg/ml, respectively). Mine came in a language that I could not read. Also, it sounds like the 10 on the slin pin is 3iu's?? Note, mg is the HGH milligram amount, dose is the click amount, and IU is the standard international unit amount. Norditropin HGH comes in two other sizes and colors. Those pens are green (15mg) and yellow (5mg). This table is only for the Norditropin Nordilet Blue Pen (10 mg).

After taking Norditropin (1.2 mg in the morning) for a month I had my levels tested. They tested at 11.6 ng/ml, which is high. Research shows it should be at or below 3.0 ng/ml so I switched to 0.4 cc in the morning and 0.4 mg prior to bed, total 0.8 a week. A pen last me 19 days, at five days a week, thats about a month.

Each brand of HGH injections has positive benefits to offer. Novo Nordisk provides Norditropin in conveniently preloaded pen systems that are premixed and prefilled. No reconstitution is necessary before using the Norditropin FlexPro Pens that come in 5 mg, 10 mg, and 15 mg strengths.

Not sure the history of this document but a religion teacher gave us this in high school. He was a great teacher for the real value he imparted to us, between exploring different religions and native spirituality, it sparked my mind to the possibilities. He even had a group prayer to start the class and over the years that made me reflect on the power of prayer. My self coming from a family of apes who didnt have much substance to contribute as far as the real values of life, the traps are abundant, between weak ass faith and religious dogma many parents dont guide the kids right, and that was then.
