

Dbol Testosterone Steroid

[→ VISIT OUR SHOP ←](#)

Dianabol is the testosterone hormone with an added double bond at the carbon one and two position. This slight alteration reduces the hormone's androgenic nature. It also carries an added methyl group at the 17 th carbon position that allows the hormone to survive oral ingestion, officially classifying Dianabol as a C17-alpha alkylated steroid.

A testosterone derivative, Dianabol belongs to the C17-alpha alkylated family of anabolic steroids; a structural alteration that allows it to survive the first pass through the liver. As a result, Dbol carries a strong hepatotoxic nature, and this will be important when we look at the side-effects of this compound as will be its aromatizing ...

Y tú, mientras esperas, te quejas de tardar tanto por una persona que estaba riéndose y molestando en la sala de espera, consideras que lo que tú tienes es prioritario respecto a la persona que se reía. Te enfadas, te cabreas y la tensión va a más y, cuando te atendemos, pagas con nosotros toda esa ira que has acumulado en la sala de espera. Nosotros callamos. [1][1]

Each of these substances is a powerful mass gaining steroids. Superdrol is a derivative of DHT, while Dianabol comes from testosterone. Dianabol has lower side effects, but Superdrol will help you gain muscle tissue faster. What about Anadrol, its effects are also higher than Dbol, but negatives are also multiple compared to Dianabol.
