Clenbuterol - All Bases Covered. The largest customer bases for Clenbuterol are dieters and bodybuilders. The irony is that while one group may want to get skinny, the other is trying to get as bulky as possible, albeit through a controlled fashion. DID YOU KNOW - Clen is not actually a steroid. It was originally developed for horses (with ...

In any case, it's important to remember that having pain with these exercises is actually OKAY and safe, as long as it is mild/tolerable and doesn't lead to significant increases in pain for hours afterward or into the next day

Clenbuterol is a performance-enhancing drug used by bodybuilders and other athletes. However, unlike many of the drugs that fall into this category, it is not a steroid and actually works somewhat differently to anabolic substances. This can create some confusion among those who are interested in PEDs.
