Add to cart Category: Oral Steroids Tag: Featured Description [linked here](#)

Oxandrolone is coming in doses of 10 mg per tablet and the recommended dosing range for men is anywhere between 20 mg up to about 70 mg a day for men and anywhere between 5 up to maximum 20 mg a day (or even less) for women. Because of Oxandrolone's half life which is only 10 hours, the compound is recommended to be used at least 2 times per day. [on the main page](#)
