Deca-Durabolin is an intramuscular injection and the most common sites for injecting at the large muscles in the buttock, upper thigh or upper arm. The good news for those of us who are not enthusiastic about regular injections is that you can get away with a once weekly injection of Deca, although if you're taking a higher dosage some people ...

El día de mañana es el día mundial de la salud sexual y se han organizado varios eventos para poder hablar sobre el tema y generar consciencia de la importancia de la salud sexual.

□ A 100 MG injection of Deca Durabolin can be prescribed for the following: Postmenopausal Osteoporosis: A 100mg injection of Deca Durabolin is used to manage the symptoms of osteoporosis in women who are post menopause. It helps to improve bone density and prevent bone fractures.

I'm not rich, I don't have parents or partner that pay for my wants.. I'm independent, and clever.. that's all I prefer to collect memories than five stars hotels, eating in restaurants when I can clock something even more delicious in home, I don't drink, you'll not find me in a bar or club, but.. if you'll ask me to spontaneously buy plane ticket and go somewhere I'm in!

Deca Durabolin Dosage and stacks. Deca Durabolin has a very long half-life of up to 16 days. This means that one injection a week is all you need for performance enhancement. Start off with 300mg/week for a 16-week cycle. If you up the dose, reduce the cycle duration. 400mg/week for 12-weeks. 500mg/week for 10-weeks and so on.
