"Lime" strain suggestions - Strain Talk - UK420

Dutch passion daiquiri Buts it's an Very very lime At times too 4 people like this Posted December 5
Only time I've had lime weed was from a pack from The Flying Dutchman of The Pure (sk#1) I'd love a
cut of that My next pack everything tasted like It's ashame lime is so much rarer than lemon flavoured

SAFC Drinks: Purple Punch - Drinks - Coco - Coco For Cannabis

Grow Style	6.5 litre coco ('coir') fibre containers with 400w HPS
Yield	200g, note the plant was harvested later than usual, 14 weeks after germination
Grow comments	Grower felt that the coco-fibre grow allowed the hashy Afghani flavours to develop. Best Blueberry aroma's come from soil-grown plants
Feeding regime	AutoBlueberry was fed bloom nutrients throughout the grow, no 'veg' nutrients
Tips	Remove lower branches and foliage to allow best final result
Effect	In small doses AutoBlueberry reduces stress and is useful for being at work. In bigger amounts she becomes a heavier more sedating stone but still pleasant.

Who here grows outside autos? | Page 2 | Rollitup

Grow style	Started under 400w HPS, finished under 300W LED. Deep water culture hydro, Hailea V-60 60LPM air pump and two large air stones.
Light cycle	20 hours lights on, 4 hours darkness
Time to harvest	79 days from germination to harvest
Temperatures	Constant 20°C
Nutrient regime	Advanced Nutrients Sensi A and B Grow and Bloom with boosters, big bud, bud candy, B-52, root stimulator, overdrive, and bud ignitor, and some silica blast in the first three weeks of the grow. Mature StarRyder was able to take an EC of 2.0 +
Grow room	Home built grow box 180cm x 180cm x 90cm, temps stable at 20°C
Yield	236g (best ever result for this grower from a Dutch Passion auto variety). "Very strong"
Growers comments	Easy variety to grow, would suit new growers or experienced growers StarRyder can handle strong nutrients near the end Easy to trim

I had a Dutch Passion Daiquiri Lime which needed a ridiculous amount of time, since it was in a pot I was able to move it into the garage and finish it under a light, long after the outdoor season had gone to cold/rain and the rest of the harvest was dry and in So there are pros and cons to every Keeps ya on yer Dremine169

Cinderella Jack bud development question - The Autoflower Network

Grow Method	Soil ('Plagron Light mix') in 7.5 litre pots. 600W HPS light
Harvest	Around 450 g in 70 days, 6X StarRyder and 1xTaiga #2
Plant hight	1 metre
Nutrients	BioBizz Fish Mix & Bloom
Grower tips	Keep it simple, StarRyder is easy to grow. She likes strong nutrients near the end
Germination	Root Riots 'starter cubes' recommended to ensure good germination rates
Smoke strength	"deadly"

The Daiquiri Lime is the tallest and the slowest, and promises to be the biggest The Glueberry OG has some odd looking but nice fat buds The Cinderella Jack is the one that has me going "hmmmmmm", at the You can see from the first picture taken lower on the bud structure that the pistils had started to turn

Top 10 Citrus Weed Strains - Herbies

Germination method	Seeds soaked in water for 24 hours then germinated in 'Root Riot' seedling cubes
Grow method	Soil grown, 14 litre Airpot.
Soil	Plagron Light Mix
Lighting	Grow Northern LED, 2 x Ms006 180 Watt.
Nutrition	Advanced Nutrients, peak feeding was EC of 2.0, 3 litres per day
JTang tips	Use biggest pots for best yield and consider SCROG or LST Tie the side branches to the main stem to prevent breakage
Seed – harvest time	84 days
Yield after drying	303g

Auto Daiquiri Lime (Dutch Passion) Autoflowering Will transport you up to the highest peaks 22 - 26 % 500+ g/m² Go to strain Even among citrus strains of weed, Auto Daiquiri Lime stands out for her intoxicating full-bodied flavor that combines a mixture of citrus and other fruits along with notes of diesel

How To SCROG Cannabis Plants For Better Harvest - Grow Tips

Light	1250w HPS (600w air cooled, 400w & 250w)
Containers	10 litre plant pots
Nutrients	General Hydroponics FloraDuo A/B with Floralicious+, Liquid Koolbloom, and Calimagic (Cal/Mag supplement).
Grow method	Hydro 'ebb & flow' technique (roots systematically flooded with nutrient solution which then drains away). SCROG system. Scrog net 30cm above soil level
Life cycle, seed to harvest	80 days
Yield	650g (22.8 ounces) dry weight from 5 plants, all branches removed.
Comments	General Hydroponics Bloombooster made a big contribution to yield
	Pests (root aphids) were a slight issue on this grow
	Air conditioning used in room to moderate temperature
Recommendations to other growers	Calcium/Magnesium supplements were felt to be important to the final harvest quantity.

Desfrán (Dutch Passion) is mixed of genetics from the multiple cannabis cup-winning Latin America This hybrid is a dream for any grower using SCROG because of its flexible branches, which are easy to manipulate into a SCROG The stretchiness of genetics means your screen will fill easily and

Yields are

Strains of the Week - 22nd to 29th of September 2021

Grow system	5-plant Screen of green ('Scrog'), 300 litre nutrient reservoir, 1.2m x 1.2m screen
Lighting system	2x 1000w metal halide initially. Lights switched to 2x 1000w HPS after vertica stretch ended. Lights on a permanent cycle of 20 hours light followed by 4 hours dark
Nutrient consumption	Think Different loves heavy feeding, up to 1150ppm. Mature females drunk 5 litres (1 gallon) per day during bloom and peak consumption was just under 10 litres per day (2 gallons)
Growers comments	Think Different was a low-odour variety. At harvest citrus-fruit was the dominant aroma. Best yields from Think Different come from a combination of hydroponics and SCROG. 'Use as much light as you can'
Yield	2.2 Kg (just under 5 pounds) from 7 Think Differents. 5 of the Think Differents were in a SCROG, the other two plants were in DWC buckets nearby
Type of high	Uplifting, smooth, long lasting. Dense buds but not very smelly. Good medical feedback from several users.
Would you grow Think Different again?	Yes!
