The reason I think it's so cool is because it's pretty much a fusion of anavar and dienolone. Plus, seems to take the features of both chemically and manifest them seemingly in degrees of magnitude higher. This is illicit for use, so any abuse would be dangerous and illegal. I would definitely love to see data on how it worked in humans though. My hunch is likely large gains in lean tissue and a ton of neurological drive at the expense of sever HPTA shutdown, blood pressure and lipid issues in equal or greater proportion, and definitely damage if not straight cirrhosis.
