My last cycle (first run with tren), I started at 150mg of Test and 300mg of Tren ace, but bumped my test up to 500mg after the first week. Personally, I like running test at at least 250/300 minimum for any cycle. I just feel better when my test levels are way above natural levels. Maybe it placebo, maybe it not. I just feel better when my test levels are way above natural levels. Maybe it placebo, maybe it not. have been up to 650-700mg tren e before. was running 400mg tren e and 250-300 tren a pw recently along with 250mg test e pw strength gains were great, been off 4 weeks now but strength is the same and overall scale weight loss is 26lbs #insalubridade #adicional #direito #trabalho #trabalhista #empresarial #salario #fgts #trt #tst #limpeza #terceirizacao#advocaciaespecializada #direitodotrabalho #direitodotrabalhador

One cycle I ran for a competition that stands out to me was 300 mg/wk Tren, 300 mg/wk test prop, and 300 mg/wk oil based Winstrol for 8 weeks. I looked absolutely SICK from that cycle! I was harder than nails, vascular as hell, and pumped looking. Description End of a glorious cycle: 12 weeks on Deca 300 and Test 250 (taking 300 of Deca a week and 600 of Test) My strength shot up, most noticeable on my overhead press where I got up to 185lbs, 3x10.

test at 500 then do tren e at 300. personally i love the tren e at 400mg and test at 750. great strength and vascularity. DO NOT run the tren e for longer then 12 weeks (this in my eyes doesnt include dosing down.) and run the test for 14 (then dose down) Tapering is the best way to come off an into PCT makes everything a breeze.
