Let me take a second to show my client off. She is over #40 killing it. Super hard working still making time to wake up very early and train with full effort. She got very sick and cares about her health. She was calling me from the ER telling me that she wanted to start already, waited a month and came back hard. You are amazing.

Anavar is a testosterone derivative that is even more anabolic than testosterone itself. Actually, data shows that it could be 3-4 times more anabolic than testosterone! That explains why the compound shows excellent fitness results. However, just like other anabolic steroids, the compound is not without its harsh side effects.

Compound lift, superset and Tri set all included and listed below, also was my first hit of smelling salts ☐☐ holy hell it was grim but did help with my O/H press which I'm notoriously poor at normally.

Anavar is not in high supply on the black market, and prescription Oxandrolone can be hard to get and rather expensive. Even black market versions will cost far more than most oral steroids. It is not uncommon for a 5-10mg Oxandrolone tab to cost \$1-\$4 per tab, where steroids like Dianabol can easily be found for a few cents on the dollar per ...

□ Catabolic exercises are aerobic, or cardio, exercises. They may include moves — like running, swimming and biking — where you're in a steady active state for a relatively long period of time
