09/15/2017 - 22:35. Ai's are Ai's and Proviron and Masteron are DHT steroids with anti-estrogenic properties. There is a big difference. My opinion is, since this isn't the 90's anymore , it would be irresponsible for a person to rely on a steroid to control all their estrogenic side effects while on cycle.

DECA vs MASTERON vs EQ - MuscleChemistry

I'm doing a low dose with it as well of course but a good test/deca trt-cruise level stack has always been very good to me. Currently doing 200mg test E 100mg deca 200mg masteron E I have to say I miss the extra libido boost from the primo but it'll have to wait for now. I've started back with a heavy lifting regimen.

Test + Deca + Mast is a great cycle. I prefer High test, medium deca, and low mast. e. g. 500 test, 300 deca, 200 mast. Test is the base of the cycle, deca adds a nice anabolic kick, and mast helps keep some of the sub-q water at bay and also combats some of the sides many get from deca.

Moderate Masteron Cycle

A moderate Masteron cycle is perfect for a mild cutting plan or for the purpose of enhancing athletic performance. Such a Masteron cycle will produce results that are largely dependent on your diet, but most men will find such a plan is very well-tolerated. If you've never used this steroid and you're looking for a moderate boost, the following Masteron cycle may be for you:

Week	Masteron	Testosterone Cypionate	Anavar	Arimidex
1	300mg/wk	200mg/wk	30-50mg/ed	0.5mg/2-3x/wk
2	300mg/wk	200mg/wk	30-50mg/ed	0.5mg/2-3x/wk
3	300mg/wk	200mg/wk	30-50mg/ed	0.5mg/2-3x/wk
4	300mg/wk	200mg/wk	30-50mg/ed	0.5mg/2-3x/wk
5	300mg/wk	200mg/wk	30-50mg/ed	0.5mg/2-3x/wk
6	300mg/wk	200mg/wk	30-50mg/ed	0.5mg/2-3x/wk
7	300mg/wk	200mg/wk	30-50mg/ed	0.5mg/2-3x/wk
8	300mg/wk	200mg/wk	30-50mg/ed	0.5mg/2-3x/wk

Note Arimidex may or may not be needed.

Intermediate Masteron Cycle:

An intermediate Masteron cycle can be used for cutting or athletic performance. However, most athletes will not need such a Masteron cycle and will be happy with the moderate plan listed above. The intermediate Masteron cycle is perfect for all levels of steroid use experience with the exception being first time steroid users. If you have steroid use experience, with or without Masteron experience, the following Masteron cycle can be implemented.

Week	Testosterone Propionate	Trenbolone Acetate	Masteron	Winstrol	Arimidex
1	100mg/eod				0.5mg/eod
2	100mg/eod				0.5mg/eod

Advanced Masteron Cycle:

Judging from what I've read online it sounds like deca is the go to for strength but my coach and a few guys at my gym have vouched for masteron and it's ability to increase strength. I'm after some personal experiences on either compound. Cheers. 07-10-2022, 12:16 AM #2.

Deca or Masteron? - Steroid

Masteron (drostanolone propionate) Drostanolone Propionate is an anabolic androgenic steroid that first hit the market around 1970 under the trade name Masteron manufactured by Syntex. However, the compound was actually developed by Syntex in 1959 along with Oxymetholone (Anadrol) but would not be released until well after Anadrol.

Jul 5, 2001. #3. u shouldnt be at those doses -but the best way to make sure is to stack it (deca) with 50mg of winny ED beautiful!!! Masteron is also a DHT derivative and thus u are still suceptable (tho less so). go with the deca IMO - it will also make ur cyp injections more friendly. u can gain an easy 20lbs if you eat right and train hard.

cycle suggestions for test, deca, and masterone stack?
