The dose for Tri-Trenbolone is between 150 mg and 300 mg per week. Some men take up to 450 mg per week, but you should start with a lower dose and see how your body responds to it. Remember, the higher the dose, the higher the risk of side effects. Tri-Trenbolone is a very powerful steroid so a low dose does go a long way! But it also comes packed with fat and sugar that can derail your diet. So if you're just about to reach for that 250 calorie chocolate bar, try one of these tips:

START BY DOING 1 PUSHUP
START BY DRINKING 1 CUP OF WATER
START BY PAYING TOWARDS 1 DEBT
START BY READING 1 PAGE
START BY MAKING 1 SALE
START BY REMOVING 1 NEGATIVE FRIEND
START BY WALKING 1 LAP
START BY ATTENDING 1 EVENT
START BY WRITING 1 PARAGRAPH

START TODAY.
REPEAT TOMORROW.

Tri-tren 200 dosage is going to be much lower than you may expect due to the highly potent nature of the compound. Whereas you would inject up to 1000 mg of other products during the course of a typical cycle week, you'll need to stick to a maximum of 400 mg when using tri-trenbolone if you want to avoid adverse side effects.

Что рекомендуют учёные□□□, а я их поддерживаю! Отдыхать душой и телом в первую неделю, а со второй ради снижения возможной травматик, вызванной длительным отдыхом провести одну тренировку на всё тело с теми же рабочими весами всего в 1-3 рабочих подходах.
