Cervical Spondylosis (Arthritis of the Neck) - OrthoInfo - AAOS

An epidural steroid injection (ESI) is an injection of anti-inflammatory medicine — a steroid or corticosteroid — into the space around your spinal nerves known as the epidural space to treat pain caused by irritation and inflammation of spinal nerve roots. Healthcare providers use ESI injections as a chronic pain management tool.

Amy Schumer says she has Cushing's syndrome. What to know about the .

Doctors & departments Diagnosis Your health care provider will take a medical history and do an exam. The exam will include checking for tenderness, numbness and muscle weakness. And it will test how far you can move your head forward, backward and side to side. Imaging tests Imaging tests might help find the cause of the neck pain.

Neck pain - Diagnosis and treatment - Mayo Clinic

CERVICAL RADICULOPATHY

DEFINITION & SYMPTOMS

- Radiculopathy when one or more nerves are affected at the level of the nerve root (radix = "root") resulting in pain (radicular pain), weakness, & numbness. Cause can be disc herniation, spondylosis or osteophytosis.
- Increased prevalence 40-49 years of age. BOYLES ET AL 2018

DIAGNOSIS

- Positive Spurling's test
- Positive distraction test
- Cervical rotation < 60 degs
- Positive Upper Limb Tension Test WAINNER ET AL 2003

NATURAL HISTORY OF CERVICAL RADICULOPATHY

- Substantial improvement 4-6 months
- Time to complete recovery can be 24 - 36 months
- Small proportion have residual pain and disability
- Neurological deficit: full recovery in majority of cases with no myelopathy WONG ET AL 2014

EXERCISE & MANUAL THERAPY MORE EFFECTIVE THAN 'WAIT & SEE'

INTERVENTION:

- Exercise: neck specific / upper limb
- Manual therapy
- Pain coping / stress management
- Multimodal approach more effective than manual therapy alone
- Placebo cervical traction no better than cervical traction BOYLES ET AL 2018 THOUMES 2016

SURGERY V PHYSIOTHERAPY: MINIMAL DIFFERENCE LONG TERM

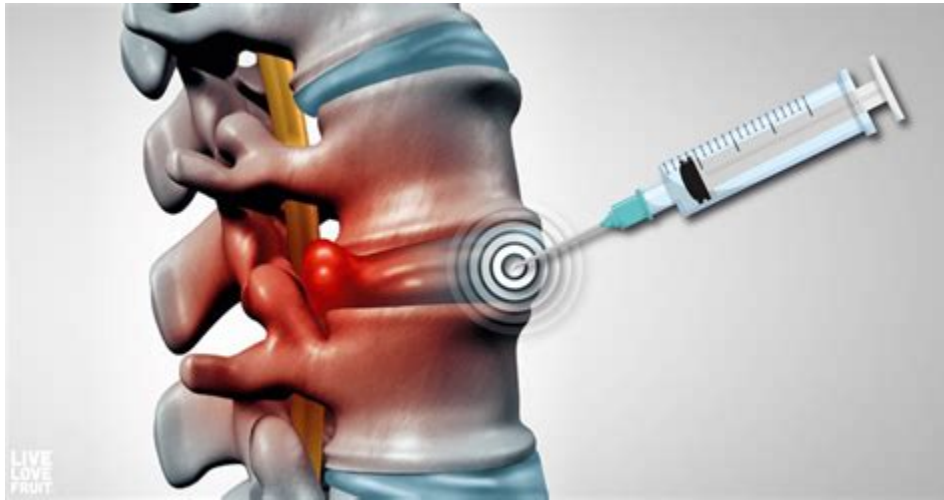

- Surgery confers greater reductions in pain in short term
- At 2 years minimal differences between surgery & physiotherapy in neck & arm pain and disability i.e. 80% of surgical v 70% of physiotherapy self-rated as "much better / better". ENGQUIST ET AL 2013
