First I'd expose his payload. Then I would use my power wench and set off a controlled explosion inside him.

Venom was a potentially addictive strength-enhancing super-steroid. According to JSA Classified #17 (November 2006), Venom was a highly-addictive compound that was engineered to significantly multiply one's physical strength. A common user of Venom was Bane, one of Batman's arch-enemies. Venom was a potentially. Batman Wiki Explore

Robert Pattinson REFUSED To Use Steroids For Batman!?

No. In batman venom he makes uses of venom and it absolutely destroys him. He spends a long time locked in the bat cave in order kick his addiction to it and declares never again. He absolutely would not use steroids. thicknheart • 8 mo. ago I specifically mentioned that venom and steroids are not the same thing though in my post.

Certainly, I don't think it's possible for a mortal man—even one who has all the money and steroids in the world—to follow that program. Secondly, the entire thing is moot, because this type of training just doesn't leave him any time for actual crime-fighting. Not to mention the martial arts training and other skills he has to work on.

Dark Knight Shift: Why Batman Could Exist--But Not for Long

Well the Batman of Earth 2 uses the drug Miraclo (more commonly associated with the hero Hourman), which is essentially steroids on steroids, to increase his strength. However, I don't think our regular Batman would resort to them.

It would make a lot of sense for Batman to use steroids considering: A. The extra performance and improved recovery time would help a lot. B. He's already shown that he doesn't care about his own well-being, so the negative consequences of PEDs would be a non-factor to him. C. And if he did care about the negative effects of steroids, he can .

What Does The Batman Inject Himself With? - Screen Rant

The theory even offers potential reasons behind Batman's use of steroids in *Batman v Superman*. The very nature of DC's two most iconic heroes makes a rivalry between them seem inconsequential. One of them is a billionaire with impressive gadgets, and the other possesses near-immortality and godlike strength (among other powers).

Batman is on steroids, right? - Comics and Graphic Novels . - GameFAQs

Does Batman use steroids? I'm inclined no because if he did than why would he stop at simple (irl) steroids and not at the hundreds of superhuman giving steroids that probably exist in the DC universe. Unless maybe it's an ego thing or some sort of stupid rule he has. I know he's peak human but he's very strong for really any human being. 0

DCEU Theory Cleverly Explains Ben Affleck's Batman Change In BvS

In the "Venom" storyline, Batman starts using the drug Venom - basically a stand in for steroids. (Later this drug would be used by Bane, but this is pre-Bane.) Soon, Batman realises the terrible effect the drug has on his body/psyche, and quits, cold turkey. (It's much better in the comic, I promise.) So no, no steroids for Batsy. BillzB89
