

Final Verdict. Cell-Tech offers no benefits when it comes to weight loss and fat burning. It is basically a creatine supplement that helps with recovery and muscle building. It can cause significant weight gain because creatine basically works by increasing the amount of water in the muscles. This means that you will be gaining weight instead .

Creatine Might Be the Ultimate Muscle Supp. Here's How It Works

Why Use Creatine

What most people think is best:
5 grams a day, whenever

How to maximize the creatine intake:
1. Studies found that consuming creatine with *carbs or carbohydrates & protein* (meal or shake) had the highest levels of muscle creatine
2. Studies found that consuming creatine post-workout had a *slightly* higher uptake vs. pre-workout

Best form of creatine?
Due to the lack of supporting evidence on other creatine, *creatine monohydrate* is found to be the best form of creatine

How much creatine?
