^a Accurate indicates that the amount of the ingredient detected was within 20% of the amount listed on the label. If the difference between the amount on the label and the amount detected exceeded 20%, the ingredient was classified inaccurate. The quantities of labeled and nonlabeled ingredients are expressed in mg per maximum daily serving size recommended on the label. Maximum daily serving size was calculated by multiplying the quantity of an ingredient found in an individual serving size by the maximum servings per day recommended on the label.

^b The limit of detection of 5-alpha-hydroxy-laxogenin was less than 0.02 mg of this molecule per capsule of 500 mg powder (ie, less than what is present in 1 capsule of all samples). The limit of detection of folic acid, vitamin B₆, and vitamin D (ie,

ergocalciferol and cholecalciferol) was lower than 0.005 mg of this molecule per capsule.

^c Owing to the small detectable amount of pyridoxine in the sample, SD could not be calculated.

^d The label of the product listed a plant that may contain small amounts of diosgenin as a constituent (ie, sample B was labeled as containing an extract of *Smilax sieboldii* while sample C was labeled as containing extracts from both saw palmetto and *Tribulus terrestris*).

^e Bioferine is a patented extract obtained from black pepper fruits containing at least 95% piperine.

Supposedly, laxogenin boosts muscle growth and fat burning without steroid-like side effects. It was safe in animal studies, but no clinical trials have tested it yet. Based on limited research, laxogenin may stimulate muscle growth, physical fitness, and muscle recovery. It might also fight cancer and reduce blood sugar.
