the orals will shut down your natural testosterone production. This is very common knowledge and why everyone is harping all over your ass. You need to run a test base with orals otherwise the oral will just shut you down - you're basically using a mild aas to shut down your natural testosterone so you'll get 0 benefit and end up with a nasty pct fun time.

My winstrol journey, and lasting joint pain post cycle.

The problem with a Winstrol only cycle is that you'll experience shut down while doing the cycle, and Winstrol doesn't function like T in your body, so you're gonna have a high Winstrol/stanozolol concentration in your blood, but almost no T. This will lead to symptoms of low T even while on the cycle. You're also gonna crash your E2 (estrogen) values, as these come from conversion of test to E.
