Beatrice never misses a beat with her three times per week personal training sessions. She shows up even when she doesn't feel like it ☺. Oh and the limp is all but GONE. With just three months of hard work and consistency.

You NEED a healthy metabolism in order to achieve true gut health. Failing to address the root cause is not going to get you very far in terms of long-lasting, overall healing.

While lifting weights, a large part of the stress is on the nervous system, not necessarily the muscles. Lifting heavy weights can make you strong but not necessarily big. To put 100% effort on your muscle its better to use full range of motion. Lifting heavy weights without full range of motion would not put 100% stress on the focused muscle, other than that you might be using your other muscle power as well to lift that weight, for example: Using your back while doing barbell curls. If you cannot lift a weight for about 8-10 reps you are also not optimally building muscle. Don't be an Ego lifter. □ #Pakistan #musclebuilding #workout #fitness #shredded #weightlifting #gym #insta #fitnessfreak #sports #sportsguy #khanreports
