I know steroids work, I work in construction I have guys working with me on the stuff and they have their own personal suppliers. Biggest waste of money out of my wallet. If I knew it was the product from the beginning I could have saved myself on training and the juice. That is why there are reviews for products online.

Steroids-Canada is a great, friendly and reliable company. Emails are answered on a daily basis, orders take 2-3 days to arrive and the packaging is discrete and safely packaged to ensure nothing breaks. The products offered are amazing, I would recommend the testosterone propionate and enanthate. I look forward to trying the deca on my next cycle.
