The portion of the testosterone mixture in the product is 250 mg/ml. This solution is sold in glass vials with the volume of 10 ml. Due to the fact that Testosterone Mix includes 4 different kinds of testosterone, it provides both fast results and stable concentration of testosterone in blood throughout the entire muscle gain cycle. With all of this being said, by purchasing the testosterone blend - Testo Mix 250 from Spectrum Pharma directly on this page on our website IronDaddy.to, the pack is going to contain one 10 ml vial and the dosage of 250 mg is per ml. In the end, the total dosage of the testosterone blend per vial is 2500 mg.

Sustanon 250 is designed to provide a rapid peak in testosterone levels (24-48 hours after injection), and maintain physiological concentrations for approximately 21 days/34. Each 250 mg ampule provides 176mg of testosterone.

Sustanon testosterone mix 250mg 10ml is a blend of four testosterone components. It comes in form of a 250mg injection that contains 60mg of testosterone phenylpropionate, 30mg of testosterone propionate, 100mg of testosterone decanoate and 60mg of testosterone isocaproate.

Sustaver is a mix and match of 4 active testosterone esters. With a total of 250 mg, this injectable anabolic steroid combines Testosterone Propionate (30 mg), Testosterone Isocaproate (60 mg), Testosterone Phenylpropionate (60 mg) and Testosterone Decanoate (100 mg), making it a full spectrum testosterone steroid. #boxing #followthebald #bald #careca #rase #chauve #cleancut #cleanshave #borntobebald #testosterone #nakedshave #smoothshave #smooth #shavingcream #shavingroutine
