Primobol is also a very popular steroid with women bodybuilders where it's low androgenic properties and mild nature makes it a very safe choice for them to use. Male bodybuilders often use Primobol in a dose of 300-800mg a week, anywhere from 8-16wks, while women find that a dosage 50-100 mg will generally yield desirable results. [check this out](#)

Primobolan is one of the best steroids for women due to its mild nature causing few side effects. Women can expect a modest increase in muscle mass and a decrease in fat mass due to increased protein synthesis and nitrogen retention in muscle cells. Primobolan Acetate is the oral version and Primobolan Enanthate is an intramuscular injection. Mar 22, 2022 [click this over here now](#)
