Methandienone 10mg tablets are one of the oldest and best understood drugs categorized as an anabolic steroid. Many similar drugs meant to achieve various effects differing only slightly from Methandienone have been synthesized over the years. Methandienone still remains one of the most potent, and is commonly sold under brands such as Danabol DS.

You typically will be able to buy Methandienone 5mg or 10mg tablets in Romania, in a box of 20 to 100 tabs. Some people take 50mg to 100mg, but the higher the dose, the higher the risk of adverse effects. The maximum time recommended to take Naposim Terapia is eight weeks, but only for the most experienced users.
