Testo Mix is an injectable product that is often used by bodybuilders in a steroid cycle. The active substance of this medication is Testosterone Isocaproate, Testosterone Phenylpropionate, Testosterone Propionate, Testosterone Decanoate. Original Testo Mix is produced by the world famous brand Eminence Labs. TestoMix (Sustanon) is a composite testosterone that consists of four esters: 30 mg propionate, 60 mg phenylpropionate, 60 mg isocaproate and 100 mg decanoate. This combination of long and short esters allows you to quickly feel the effect of the drug and prolong its action, which together eliminates steroid pits. En eso consiste lo que buscamos hacer. Practicar una medicina humana.

HUMANA con toda la extension biologica filosofica y espiritual de la palabra. La perfecta imperfeccion del ser humano.
