Nebido® is the first long-acting testosterone injection for the treatment of male hypogonadism. Long term treatment therapy with Nebido® increases the improvement of erectile dysfunction and sexual mood, metabolic syndrome, muscle mass and strength.

Doença de Lyme: (Advertência: isto é uma experiência pessoal, não um estudo duplo-cego.) Alcançar uma cetose profunda (para mim, de três a seis milimols) por meio de jejum e depois continuar com uma keto de calorias restritas durante uma semana erradicou completamente os sintomas da doença de Lyme, depois de eu ter tentado de tudo.

Hypogonadism is the medical term for testosterone deficiency and simply means having a very low testosterone level. It happens when the testes do not function normally or when internal hormone production is out of balance. Low testosterone can occur in men of any age. However, there is a progressive decline in testosterone levels as men age.
