Stanozolol is used in the treatment of hereditary angioedema, which causes episodes of swelling of the face, extremities, genitals, bowel wall, and throat. Stanozolol is being investigated for use in the treatment of COVID-19 complications. Stanozolol is available in both oral and injectable form, but in either case it is a C17-aa steroid making the cardiovascular strain equal in both oral and injectable form. Stanozolol can be used without severe cardiovascular strain but should not be used if you already have cholesterol issues. Known as red ochre, it is a stone that has been used by people for hundreds of thousands of years, and is still used as sunscreen by some tribes in Africa. In TCM it is used to stop bleeding, as its red color has an affinity with the blood. It is also settling to the spirit, which can feel almost like a sedative! One willow apothecary has a hot chocolate recipe with a little hematite for facilitating long winter night sleeps.
