(Testosterone Enanthate Injection, USP) provides testosterone enanthate, a derivative of the primary endogenous androgen testosterone, for intramuscular administration. In their active form,... Donating blood products is essential to community health and the need for blood products is constant. As part of our nation's critical infrastructure, healthy individuals can still donate in areas that have issued shelter in place declarations or are operating under a phased reopening plan. The Red Cross follows the highest standards of safety and infection control, and volunteer donors are the only source of blood for those in need. As hospitals resume surgical procedures and patient treatments that were temporarily paused due to the COVID-19 pandemic, donors are urged to give now to ensure blood products are readily available for patients.
