

Primo Anavar Cycle Best Underground Steroid Labs 2021 #eY4vb

SHOP NOW ONLINE: <https://bit.ly/3jL35UN>

Anavar + Primobolan Stack Very safe mix for definition, popular for preps in competitive fitness, women's bodybuilding and men's-physique. Competitive athletes respect this stack for a low incidence of side effects and very high anabolic impact. Though with a high anabolic index of (400%), Oxandrolone is weak solo. In combination with Primobolan drugs have severe [...] Also primo can have some harsh effects on the diet. It means that you might feel a loss of appetite but at the same time you will be able to gain good quality muscle. But people who deliberately take care of their diet, while they take Primobolan and Anavar Cycles, experience wonderful results. Must Read: Oral Primobolan Cycle - Safe Steroid.

Anavar / Primobolan / Winstrol / HGH Cycle. While Anavar is perfect for cutting, for a woman it is fantastic for bulking as well: Week 1-6 - 10mg/ed Anavar; Week 4-9 - 100mg/week Primobolan Depot; Week 7-12 - 10mg/ed Winstrol; Week 1-12 (optional) - 2iu/ed HGH *ed - every day *eod - every other day

My previous cycles was Test E 500mg 10weeks, Test E 500mg and Tbol first 6 weeks and Test E 500mg and Anavar 50mg last 6 weeks off the cycle. 39 years old, 5'8", 203 lbs, aprox 14% BF. Summer cycle. Goal is to gain quality muscle. I've ran both test and var before so the only compound I don't have any experience with yet is primo. [go to this website](#)

i am planing a similar cycle. primo 1-12 (400mg) var 1-4 (40mg) var 8-12 (40mg) or is it better to run Anavar (var) first 6 weeks ? Im decided to bump up the Anavar (var) to 60mg and keep the primo at 500mg/week. i have enough Anavar (var) right now to run it for 6 weeks. 05-04-2010, 09:53 AM #15. rrer0404.

What you said JD on *About the best thing to use to change your physique and really keep anything off cycle is primobolan. I would run primo, anavar, and a low dose of deca for 15 wks* This sounds good. I was thinking of a similar thing but with Eq over Primo (* As I am not 100% sure I can get real products of Primo)

Anavar/Primo Cycle Advice.

First off, first post so..whats up guys. Been following the board for a while and hands down best site there is. I was planning on doing an Anavar and Primo Cycle for 12 weeks. Primo 400mgs/week. Anavar 60-80mgs/week. This will be my first real cycle in the last 4 years (ran test only for 8 weeks with decent results.) Wk: 1-16 Primo 500mg (homebrew, very good quality, Primo needs to be run at least 12 weeks to see any results at 500mg or more) Wk: 1-6 Anavar 50mg-100mg (want to front load it because orals come in quicker and to kick off the cycle) 02-03-2011, 05:59 PM #4. lex57.
