<https://www.nwsaalumni.net/event/oxandrolona-preco-20-mg>

153mg Alpha Pharma Parabolin per week (Tren Hex) 250mg Noble Labs Masteron E per week (this came back gtg from wedinos and i've seen some nice reviews on them too)  
Caloric surplus will be at 500 extra calories per day, consisting of chicken, oats and vegetables.  
Why are the restaurants and the public transport opening up while the gyms stay closed? We need to think about our health people! Playing sports is so much more important, physically but also mentally.

If you're a teenager, never trust the advice of someone who isn't a professional athlete/nutritionist/doctor. They will feed you insecurities to sell you products that will have more side effects than its actual use. Always rationalize if you want a deal, where you lose a lot more than you gain. .

Name: Parabolin Alpha Pharma Effective substance: Trenbolone Hexahydrobenzylcarbonate Content: 76.5mg/1.5ml (5amps) Administration: Intramuscular injection Parabolin, labeled as Trenbolone Hexahydrobenzylcarbonate (tren hex) is a structurally altered form of Nandrolone.

Tren Hex is the larger ester based Tren compound on the market and it was first introduced by a French lab in the 1960s and was the first and only Tren hormone that ever existed in human grade form. Parabolan was prescribed for many years to treat medical conditions such as malnutrition and Osteoporosis. But, in 1997 the French lab pulled ...
