

Test Tren Deca Blend

[→ CLICK TO VISIT OUR ONLINE SHOP ←](#)

Test, Tren and Deca Cycle I just started a new 12-16 week cycle consisting 300 mg of Test E, 100 mg TrenE eod and 250 mg of Deca weekly (I may adjust the doses up or down depending on results). Also, .50mg Arimidex eod (as per my DR's advise as he knows I cycle 2-3 times a year while on TRT). Diet is on point and training is brutal.

1. Deep Survival is about real stories from the wild, actual survival tales and a few lessons applicable to our lives.

<https://pdfslide.net/documents/steroid-anavar-acheter.html>

Testosterone greatly enhances the anabolic rate and reduces the progestin activity of trenbolone. Test + Tren + Dbol is designed for athletes with experience and is not recommended as the first cycle. To the end, there will be an increase in about 20lbs of dry stable muscles. Testosterone: 200-500 mg weekly;
