Genotropin (somatropin) is a growth hormone used to help children grow taller and help adults and children grow muscle. Genotropin is slightly more popular than other recombinant human growth hormones. There are currently no generic alternatives to Genotropin. GoodRx has partnered with InsideRx and Pfizer to reduce the price for this prescription. Take pfizer genotropin pen 12mg (36iu) out of the refrigerator approximately 1/2 hour before your injection. This will bring it to room temperature (about 25°C). It is more comfortable to inject at this temperature. When using the pfizer genotropin pen 12mg (36iu) always remove the injection needle before storing in the refrigerator.

A muscular man in a red and black suit flexing his muscles. The man is shown from the waist up, with his arms flexed to show his biceps. He is wearing a red suit with black accents. The background is white with a red border.
