???? A heart attack is also known as a myocardial infarction. The five types of heart attacks are: Type 1 (spontaneous MI) that is related to atherosclerotic plaque rupture or dissection with intraluminal thrombus in one or more of the coronary arteries, leading to myocyte necrosis. Type 2 (MI secondary to an ischemic imbalance): MI consequent to increased oxygen demand or a decreased supply. Type 3 (MI resulting in death when biomarker values are unavailable). Types 4 and 5 are related to percutaneous coronary intervention and coronary artery bypass grafting. [read full article](#)
